## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-41 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility.
3. Claims 1-9, 26-35 merely recite an algorithm for compensating a carrier frequency offset in an OFDM by making an approximation for a series expansion to minimize an approximation error without a post processing step and it does not have a practical application.
4. Claims 10-13 merely recite an algorithm for compensating a carrier frequency offset in an OFDM system without a post processing step and it does not have a practical application.
5. Claims 14-21, 36-41 merely recite an algorithm for series expansion of an input function to minimize an approximation error without a post processing step and it does not have a practical application.
6. Claims 22-25 merely recite an algorithm for OFDM compensating a carrier frequency offset without a post processing step and it does not have a practical application.

### *Claim Rejections - 35 USC § 112*

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2611

8. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention and as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are the calculations.
